

A mosquito bite is a piece of cake?

Don't neglect **dengue hemorrhagic fever**: without timely treatment, **mortality is up to 50%**.

Possible symptoms and high risk groups of dengue hemorrhagic fever

Symptoms:

- Frequent vomiting
- Black-colored stools
- Bleeding from gums
- Drowsiness, breathing difficulty
- Other symptoms: red spots or patches on the skin, bleeding from nose, vomiting blood, severe abdominal pain, mental confusion or seizure, etc.

High risk groups:

- People with chronic illness (e.g., diabetes mellitus, hypertension)
- People with weakened immune systems (e.g., elderly, children)
- People that have been previously infected with different types of dengue viruses

Typical symptoms of dengue fever

How to prevent infection:

- Empty containers and ornamental fountains or cover them with covers.
- Clean vases and ornamental fountains weekly.
- Flatten canvas covers and fill up holes on the ground.
